Join us on Saturday September 17, 2011 for a comprehensive group of presentations on Amateur Radio at Universal Radio. These forums are for new Hams, perspective Hams as well as those Hams looking for new challenges in Amateur Radio. We have assembled a Blue Ribbon panel of speakers for a comprehensive group of talks on Amateur Radio. We'll start at 9:30 AM and run until 3:30 PM. Feel free to stop in or come and hear all the speakers.

Featured speakers include:

Ron-W9WL, Speaking on how to choose your 'first radio'. Which functions are a must and others you'll never use.

Mike-KC8YLD, Ohio ARRL Affiliated Club Coordinator on the League and joining a local club. The local clubs being the back bone of Amateur Radio and the ARRL. Mike provides great insight into this aspect of the hobby.

We'll have a demonstration on D-STAR and all you can do on D-STAR.

John-W8RXX, Central Ohio Radio Club Trustee of the 146.76 W8RXX/R repeater. Speaking on repeaters and repeater etiquette.

John-KD8DVR, Speaking on satellite operations through a handheld.

Stan-N8BHL, Delaware, Ohio ARES Emergency Coordinator. What to expect on both the provider and the provided for side of Emergency Communications..

Matt-KB8UVN, Builder of the largest Packet system in Ohio. The digital modes that everyone can do on a budget.

Beyond the presentations we'll have a tour of the showroom, demonstrations and refreshments. This is the opportunity that most new Hams will never have to see this many experts and leaders of Amateur Radio at one time in such an intimate setting.

Bring your questions. Bring your friends. This will get you a large amount of experience in one quick event.

Universal Radio is located at 6830 Americana Parkway (off Tussing Rd. just East of Brice Rd). Visit their website at [www.rffun.com](http://www.rffun.com) and click on 'map' for directions
